APPLICATION AREA

Food and beverages

Consumers increasingly care about a healthy and safe supply chain and want to know what goes into their food and beverages. This is why ingredients, batch numbers and shelf life always need to be clearly identifiable.

Drugstore, pharmaceuticals and other consumer goods

Codes on the packaging of consumer, drugstore and pharmaceutical articles are essential. They communicate important consumer information, they enhance the image of your brand, they minimize pre-printed stocks and protect against counterfeiting.

Industrial goods

With industrial products, coding not only fulfills the obligation to declare, but also identifies production units, ensures traceability, controls additional goods flow and optimizes operating processes. This is indispensable when companies need to produce products or systems according to defined standards.

S200 PLUS Small Character Inkjet Printer

Black Ink Continuous Printing

◆ Feature

Stainless steel body, IP55 protection level of the whole machine, more stable in various complex environments.

Independent structural design of functional accessories, scientific and reasonable design, easy to repair, reduce maintenance and the usage cost.

The nozzle valve is adopted to directly seal the nozzle hole structure design, which can prevent ink leakage from the nozzle after closing the ink line.

It has the function of shutting down and automatically cleaning the nozzle and recovery pipe.

Adding consumables is quick and easy because of the great design of ink circuit system.

Simple and easy to learn, functional layout is reasonable, and easy to operate.

Friendly human-computer interaction interface, what you see is what you get, real-time monitoring of printing status and content.

8500 Continuous Inkjet Printer

◆ Introduction

The CIJ printer features a four-in-one integrated diaphragm pump design, reducing wear and tear and saving around 50% consumables compared to the gear-pumped printers.

The auto heating function of the printhead makes sure the printhead can work in the suitable temperature and ensures perfect printing effect. The auto heating of cartridge core makes the CIJ printer work in extreme weather.

◆ Application

It is mostly used for the outer packaging and coding of food and beverage, bakery, chemical products, meat and poultry, cosmetics and personal care products; it is suitable for a variety of materials.
